Detailed Action

Restriction/Election

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1, 45-50, 68, 89-106 and 111-115, drawn to controlling data capacity based on a condition classified in class 370, subclass 235.
 - II. Claims 12-16, 71, 73-86 and 107-110 are, drawn to monitoring the quantity data, classified in class 370, subclass 232.
 - III. Claims 17-44, 55-62, 87 and 88, drawn to control means for varying the power of a communication signal, classified in class 455, subclass 522.
 - IV. Claims 51-54, 69 and 70, drawn to monitoring system interference and detecting the interfering system, classified in class 455, subclass 67.13.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions 1I-IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the different inventions are controlling data capacity based on a condition, monitoring the quantity data, varying the power of a communication signal and monitoring system interference and detecting the interfering system.

09/990,349 Art Unit: 2617

3. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Temica M. Beamer whose telephone number is (571) 272-7797. The examiner can normally be reached on Monday-Thursday (alternate Fridays) 9:00am-5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Charles Appiah can be reached on (571) 272-7904. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
